Khang Lam

Software Engineer/Developer

Summary

Recently graduated with Bachelor's Degree in Computer Science - Looking for part/full-time software development position.

Experience

2017-06 - 2017-09

Teacher Assistant

Cal Poly Pomona

• Assisted a Computer Science tenured professor in the development of his summer classes. I was in charge of grading, developing courses outlines and assisting students both via emails and in person.

• Familiarized myself with Python on the spot to provide help students on their project.

• Reference: Tenured Professor- Dr. Gilbert Young @ (909) 224-4669

2015

Awarded with first place winner as a team of four

Code Day LA Hackathon

• Produced a multi-player platform version of the game "Plant vs. Zombie", where players can play against one another interactively.

• Implemented path finding using Unity.

• Hosted a test server for multiplayer interactions.

2014

Participant

Burbank Game Hackathon

• Produced my very first game as a group which implements real life scenarios as in-game player stats. End goal is to promote healthy exercises for players. In order to get ahead in the game, one must exercise in real-life to increase player's stats in-game.

• Hands on experience coding with Unity and C#.

2017

Participant

Hackpoly Hackathon

• Attended a school-hosted hackathon event, focusing on a User-to-Root Attacks (U2R) detection program.

• Program's main focus is to detect suspicious password activities and update log files storing the users' information and IP addresses, which can be read in to distinguish between benign and suspicious password activities between IP addresses.

• Implemented using NetBeans for Graphical User Interface and SQLite for storing database.

Education

2013-09 - 2018-06

California State Polytechnic University, Pomona

Bachelor of Computer Science

Minor in Mathematics

GPA: 3.38

Personal Info

Address

1760 Halinor Avenue

Baldwin Park, CA 91706

Phone

562-228-6496

E-mail

khangtlam@gmail.com

Citizenship

U.S. Citizen

LinkedIn

Personal Portfolio (In Progress)

khanglam.github.io

Programming Languages

Java — Proficient

C++ — Intermediate

HTML & CSS — Intermediate

Javascript — Intermediate

Matlab/Octave — Intermediate

Swift and Objective C++ — Basic

C# — Basic

Python — Basic

SQL — Basic

Projects

iOS Application Development (Swift/Objective C++): Sudoku Solver

• iOS Application Interface for solving the Sudoku puzzle via OpenCV and machine learning

• Using built in phone's camera to process images and solve an empty Sudoku board while implementing AR.

Artificial Intelligence: Connect 4 Bot (via A* Algorithm and Alpha-Beta Pruning Algorithm)

• Developed an AI bot to beat opponents at the game of Connect Four with adjustable ply (depths).

• Deeper plies require more time to compute, but typically generate deeper game tree and ultimately perform more intelligent moves etc.

Android Application: Concentration Game

• Developed a card flip concentration android game using Java

• Worked with Android Studios and getting familiar with Android Studios toolkits.

• Implemented and debugged using Fragments, Android Nexus 5 emulator, as well as some hands-on experience with media players within Android Studios.

Programming Assignment: Hangman, Matching Color, and Sudoku (all-in-one) Project.

• Designed an interactive graphical interface game using NetBeans Swing and Java AWT.

Certificates

2018 Machine Learning (Pending)

2018 Neural Networks (Pending)

Technology Platforms/ Environment

Git — Advanced

Windows — Advanced

Eclipse/Netbeans IDE — Proficient

Visual Studios — Intermediate

Mac OS — Intermediate

XCode — Intermediate

Linux — Basic

Unity — Very Basic

Agile Platform — Very Basic

Selected Coursework

Machine Learning (On going)

Neural Network (On going)

Data Structures & Algorithms

C++ Programming

Database

Computer Logic

Computer Architecture

Computer Organization & Assembly Programming

Artificial Intelligence

Operating Systems

Design & Analysis of Algorithms

Computer Networks

Software Engineer
